Ms. Kumi Morris Architecture Services Coordinator The City of Iowa City 410 E Washington Street Iowa City, Iowa 52240

RE: Fire Station #4 Construction Project

Cost Estimate Methodology

Dear Kumi

This letter serves as a statement of the methodology for preparing cost estimates for the above referenced Project. Costs estimating at various phases of a design project differ based on the amount of known information at the time. This letter refers only to the current cost estimate that has been developed at the completion of the construction documents phase of the project.

The cost estimate for this project was developed using a combination approach of historical data applied to the current scope of the project and cost estimating services procured from an outside consultant. We reviewed recent historical data for similar building and construction types and applied this to the current design project. The various engineering design consultants evaluated their portions of the work and produced cost estimates based on the scope of the work and relevant recent historical cost data. Cost estimating services were procured from a consultant in order to evaluate and confirm our estimates.

If you have questions, please contact us for clarification.

Sincerely,

Rohrbach Associates PC

W/lle 152-5

William T. Downing AIA

Project Architect
